

Pitt' s Indie Game Dev Club' s 3rd Meeting Summary Expansion

1. Meeting Time

This section of the notes is labeled as the **3rd meeting**, covering the period from **14:16** to **14:38**.

2. Attendance

The attendees recorded for this portion of the meeting were:

- Jayden
- me
- Gautum
- Jack

The notes also state that:

- Jack and Jayden arrived 15 minutes late
-

3. JetBrains Student Discount

A question was raised about whether **JetBrains** offers a **free student discount**.

The notes do not preserve a full answer, but this appears to have been one of the practical setup questions discussed during the meeting.

4. Installing Rider

The next note mentions:

- installing Rider

This appears to have been part of the technical setup process. The fragment:

- “This is a...”
suggests that someone may have started explaining what Rider is, but the explanation was not fully recorded.
-

5. Entering the Spaceship Repository

The notes then state:

- enter the spaceship repo

This indicates that the discussion moved into a project-specific setup or demonstration phase involving the **spaceship repository**.

6. Showing the Problem

The next recorded item is:

- show the problem

This suggests that, after entering the repository, someone demonstrated an existing issue in the project.

Because the note is brief, it is unclear whether this referred to:

- a code issue,
- a Unity issue,
- a setup issue,
- or some other technical problem.

So it is best preserved simply as a demonstration of a problem in the project.

7. Logging into Unity Hub and the Project

The final note in this fragment states:

- Logged into Unity Hub and project

This appears to describe the last setup step recorded in this portion of the meeting:

- logging into Unity Hub
- and opening the relevant Unity project
